ivanovishado

*A human being passionate about developing tools that will enhance human-computer interactions.*

## Experience

- November 2019–Present **Software Engineer II**, *Wizeline*, Guadalajara, Mexico.
- » Currently developing significant features for one of the biggest broadcasting clients of the U.S.
  - » Give courses to the community about programming languages, trying to identify potential engineers and motivate them to start their journey in the IT industry.
  - » Making continuing efforts to begin my career on Data Science.
- November 2018–October 2019 **Software Engineer**, *Wizeline*, Guadalajara, Mexico.
- » Developed many features of a chatbot for one of the company's biggest customers.
  - » Contributed sporadically to the platform that manages all the chatbots from Wizeline.
  - » Gave courses to High School students to implement chatbots easily.
- August 2018–October 2018 **Software Engineer Trainee**, *Wizeline*, Guadalajara, Mexico.
- Worked as a Full-Stack Web Developer in the most used internal project. Developed significant new features and refactored a lot of legacy code.

## Education

- 2013 – 2018 **Bachelor of Computer Engineering**, *University of Guadalajara*.
- » Terminal Project: News scraper for Mexican news websites. Scrapes news on a daily basis from ~10 newspapers of each state of Mexico, has a web app that lets a user query for desired news and classifies news, as violent or non-violent, according to their content.
  - Try to make a search at <http://turing.iimas.unam.mx/news-scraper/>
- Summer 2018 **Summer Research Internship "Programa Delfín"**, *National Polytechnic Institute*, Mexico City.
- Helped during the development of an emotion detector software for social networks.

Summer 2017 **Summer Research Internship "Programa Delfin"**, *Research Institute of Applied Mathematics and in Systems, UNAM, Mexico City.*  
Applied many technologies related to chatbots, the main project was to create a chatbot "Linguabot+, an adviser chatbot for the practice of the English Language," to help people improve their English on Facebook. It helped around 15 people to improve their English and experience with computer programs.

---

## Volunteer Experience

February 2019– **Mentor**, *Technovation Challenge*, Guadalajara, Mexico.  
Present Successfully mentored two teams, one at the High School level and the other one at the Jr. High School, to develop mobile applications to contribute to their community by solving social problems.

January 2018– **Software Developer Volunteer**, *Research Institute of Applied Mathematics and in Systems, UNAM*, Remote fashion.  
Present Developing a news scraper for Mexican news websites.

January 2018– **Data Analyst Volunteer**, *University of Guadalajara*.  
» Analyzed data collected from students, looking to improve academic courses.  
November 2018 » Created a system that lets a user recollect data from surveys semi-automatically.  
» Helped with managing courses and delivering homework notes to students.

---
